

## Searching for a reliable, easy-to-use flow meter? You'll ♥ the Brooks solution.

The new Brooks 4800 Series mass flow controller/meter was specifically developed for the research market. Just plug it into the wall – No other power supply, cabling, or control electronics is needed.

### **Exclusive Discount for Academic Customers!**

Perfect for measurement and control of many common gases, the 4800 Series offers a broad flow range, fast response time, compact size, stainless steel body, and many other benefits for a variety of research applications including:

- Thin Film
- Solar
- Semiconductor
- Biotech
- Fuel Cell
- Petrochem
- Catalyst Development
- Environmental Monitoring

The easy to use Local Operator Interface option allows you to:

- Power the device from a wall outlet
- Read flow and adjust flow setpoint
- Open and close the control valve
- Zero the device
- Set device configuration parameters
- And more!

Brooks Instrument is a leading supplier of gas mass flow controllers. Experience Brooks' quality while saving precious research funds. Take advantage of special academic pricing – a substantial savings from the standard list price.

**This limited time offer is only available to academic accounts through May 30, 2009.**
